Registration Prices:

ORAL PRESENTATION	\$249
DELEGATE OR LISTENER	\$199
E-POSTER PRESENTATION	\$129
STUDENT DELEGATE	\$99

About Web Forum:

Chemical Engineering and Catalysis-2022 takes prominent joy to welcome you to participate in the Chemcat Web Forum-2022 which will be held during **March 10-11, 2022** with the topic: Broadcasting New Inventions in Chemical Engineering and Catalysis. You can expand your expert abilities in this extra time and examine the reasonable difficulties experienced and the arrangements embraced

About Organizer:

Auragen Group began to address the problem and sought to clarify the overall goal of scientific researchers centered in the field of science and innovation to support the exchange of ideas and information, also to encourage coordinated collaborations among researchers, academicians, and scientists in the same field. Use our foundation to improve your skills, share your assessments, suggestions and experiences; establish contacts with your fellow researchers and scientists, and have some increasingly important conversations. We may perform subjective data and information through our meetings for our current and upcoming ages. Here are a few key points that you will seek clearly during the meeting

- Get feedback on an early form of your most recent work
- Became more acquainted with others in your field
- Perceive the most recent research
- Improve your presentation and communication abilities
- Visit another place and have a ton of fun
- Meet your scholarly legends
- Participate in significant level discussions and refine your thoughts
- You can add your experience to your CV
